

Set your learning goals

- **What do you hope to learn from this internship?**

I hope to learn various aspects of working in the corporate industry from this internship, including how to collaborate with others in a corporate setting. Understanding how meetings run, how everyone presents their view is something I am looking forward to. Moreover, I am excited to learn financial researching, communicating with angel investors and learn from my peers and other experienced individuals.

- **What skills are you most excited to develop?**

The skills I am most excited to develop is giving pitches or being part of the pitches to potential investors, communicate with investors and do a lot of hands-on tasks.

- **What do you think you can contribute to the team?**

The skills I am most excited to develop is giving pitches or being part of the pitches to potential investors, communicate with investors and do a lot of hands-on tasks.

- **What is one area you feel less confident in that you'd like to improve?**

The area that I feel less confident in that I'd like to improve on is giving elevator pitches, or pitches of any kind. I want to learn how to plan one and efficiently deliver one without overloading my audience with too much information.

- **What does success in this internship look like for you?**

Success to me in this internship looks like when I feel accomplished, and know that I put in all of my effort and knowledge into the given tasks while also learning a lot of new knowledge. I don't want to be feeling like I could've performed better in the internship at the end, as to which success is more for of a feeling to me than a visual.
